6.2 PUBLIC OUTREACH PROGRAM / SCHEDULE OF MEETINGS

6.2.1 PUBLIC/AGENCY OUTREACH, PHASE I

EXECUTIVE SUMMARY

The California Public Utilities Commission (CPUC) initiated a concerted effort to invite early public agency participation in the environmental review process. The CPUC's Public Agency Outreach Program was developed by Public Affairs Management (PAM) in close cooperation with Environmental Science Associates (ESA) for the purpose of:

- Establishing early contact and opening lines of communication with key public agencies (planning agencies and air and water quality control agencies) directly affected by the proposed Pacific Gas and Electric Company (PG&E) and Southern California Edison (Edison) divestiture plan.
- Obtaining local-level insight and information from these key agencies for use in preparation of the Draft Initial Study.

Through consultations conducted at central meeting locations, agency offices, and by telephone, ESA and PAM made connections with 45 agencies which will continue to play important roles as the environmental review of the divestiture plan progresses. ESA and PAM representatives

traveled to the communities where the plants are located and obtained documents and plans that provided information regarding the potential environmental effects of divestiture to these communities. Local agency representatives provided historic background on plant operations, permitting requirements, land use information, community perceptions, and local environmental concerns. These early agency outreach activities resulted in valuable data.

6.2.3 PUBLIC/AGENCY OUTREACH, PHASE II

INTRODUCTION

The California Public Utilities Commission (CPUC) initiated a Public Agency Outreach Program (Phase II) in an effort to invite public comments and questions on the Draft Initial Studies (DIS) conducted on the potential environmental impacts related to the divestiture of 15 power plants in California. Southern California Edison Company (Edison) owns 12 of the plants targeted for divestiture; Pacific Gas & Electric (PG&E) owns three plants targeted for divestiture. The CPUC's Public Agency Outreach Program was developed by Public Affairs Management (PAM) in close cooperation with Environmental Science Associates (ESA) for the purpose of:

- Hearing comments and answering questions from the general public and relevant government agencies concerning the assumptions and methodologies utilized for the DIS.
- Allowing Edison and PG&E to comment on DIS assumptions and methodologies, and to offer alternatives and possible mitigation measures that would minimize environmental impacts.

ESA and PAM scheduled four technical workshops to take comments on the DIS for the two utilities and sent notice of the workshops to the public agencies contacted during the Phase I Public Outreach Effort, which PAM conducted prior to the production the DIS for both utilities. PAM scheduled two meetings for the PG&E application, in Monterey on June 13 and in San Francisco on June 27, and two meetings for the Edison application, on June 12 and June 30 in Pasadena.
